The graph shows three curves labeled as follows:

- **Original**
- **Smoothed with Gaussian 1D Kernel**
- **Smoothed with Box 1D Kernel**

The x-axis represents the variable labeled as **x [a.u.]** and the y-axis represents the variable labeled as **amplitude [a.u.]**. The original curve is represented in blue, the Gaussian 1D smoothed curve in orange, and the Box 1D smoothed curve in green.
